

BARRICADE

ANTIMICROBIAL MOP

BARRICADE®

LOOPED-END WET MOP

The Top Performer in Anti-Microbial Protection

The Barricade wet mop has built-in anti-microbial protection that never washes out. The first-patented formula resists bacterial growth, virtually stopping the rotting, souring and mildewing common in ordinary mops.

Its highly absorbent, 4-ply tri-blend yarn is pre-shrunk for true sizing. Available in soil-hiding green yarn, the mops have tough, double wrapped polyester headbands that help to eliminate yarn abrasion and drop down strands. Double tailbands eliminate snagging, improve performance and reduce labor.

Features and Benefits

- Ideal for hospitals, restaurants, schools or any application where bacterial growth is an issue
- Anti-microbial capabilities are permanently locked into yarn
- 4-ply yarn is a blend of cotton, rayon, and polyester for super absorbency
- Looped-end construction and double tailbands eliminate snagging, improve performance, and reduce labor
- 9" headband on all sizes except small
- Date coded to prove product longevity
